1. General add-on description

This extension to Multi-Vendor, Multi-Vendor Plus and Multi-Vendor Ultimate adds new conditions and bonuses to the promotion interface, which allow creating promotions related to vendors. Add-on also enables promotion interface for vendors, so they can create their own promotions without asking the main store administrator to do so.

2. Add-on settings

Module settings

Settings: [SoftSolid] - Promotions - Discounts for vendor [PVEN]

General Conditions Bonuses

The method of calculating discount: ☒ Proportionally ☐ Linear

Auto-add vendor related conditions to vendors promotions: ☐

The method of calculating discount - how order discounts should be handled for vendor's products promotions. If "Proportionally", each product is discounted proportionally to its price. If "Linear", products are discounted by their full price, one by one, until discount is exhausted.

Auto-add vendor related conditions to vendor promotion - automatically adds conditions "Vendors products in cart" and "Activate this promotion if cart contains products only from those vendors" to all promotions created by vendors. Prevents vendors from creating promotions that could affect other vendors.

Settings: [SoftSolid] - Promotions - Discounts for vendor [PVEN]

General Conditions Bonuses

Blocked conditions for catalog promotions:

To select several items, press and hold the CTRL key and click on the required items.

Blocked conditions for catalog promotions - select which catalog conditions should not be accessible for vendors. This setting does NOT affect administrators' promotion interface.

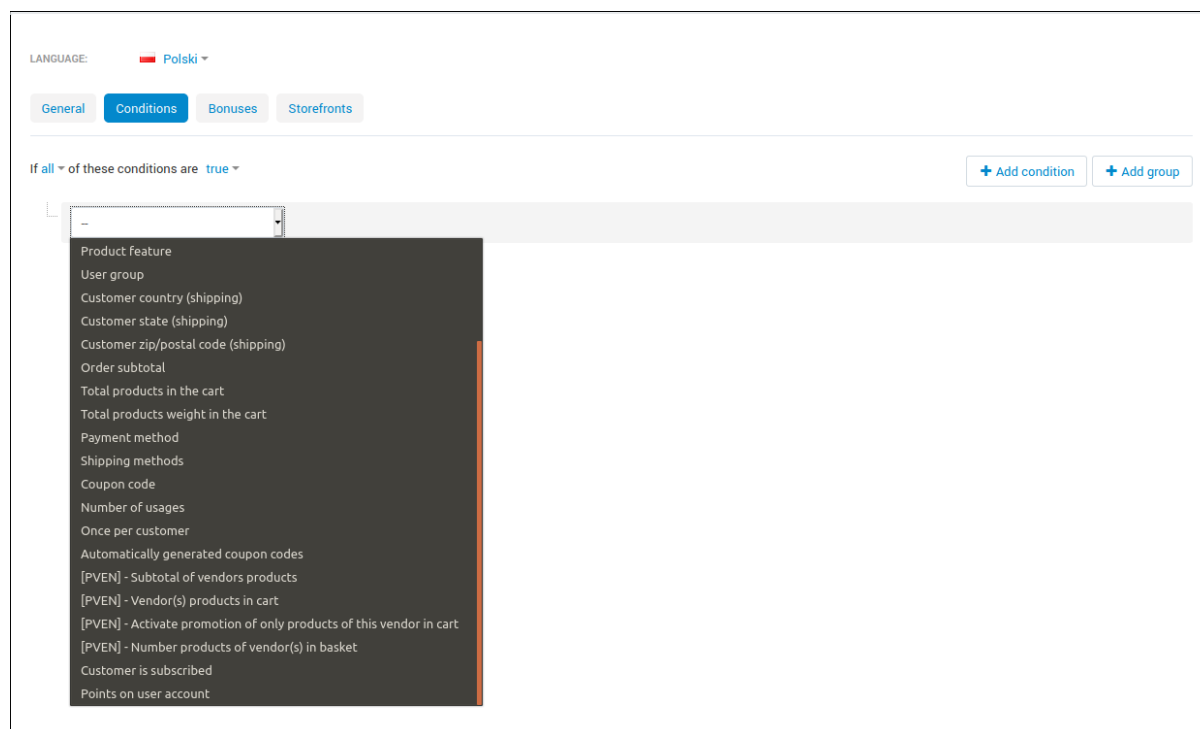

Blocked conditions for cart promotions - same as above, but for cart promotions,

Blocked bonuses for cart promotions - select which bonuses should not be accessible for vendors. This setting does NOT affect administrators' promotion interface.

Promotions settings

Conditions

All conditions created by this add-on start with [PVEN] tag.

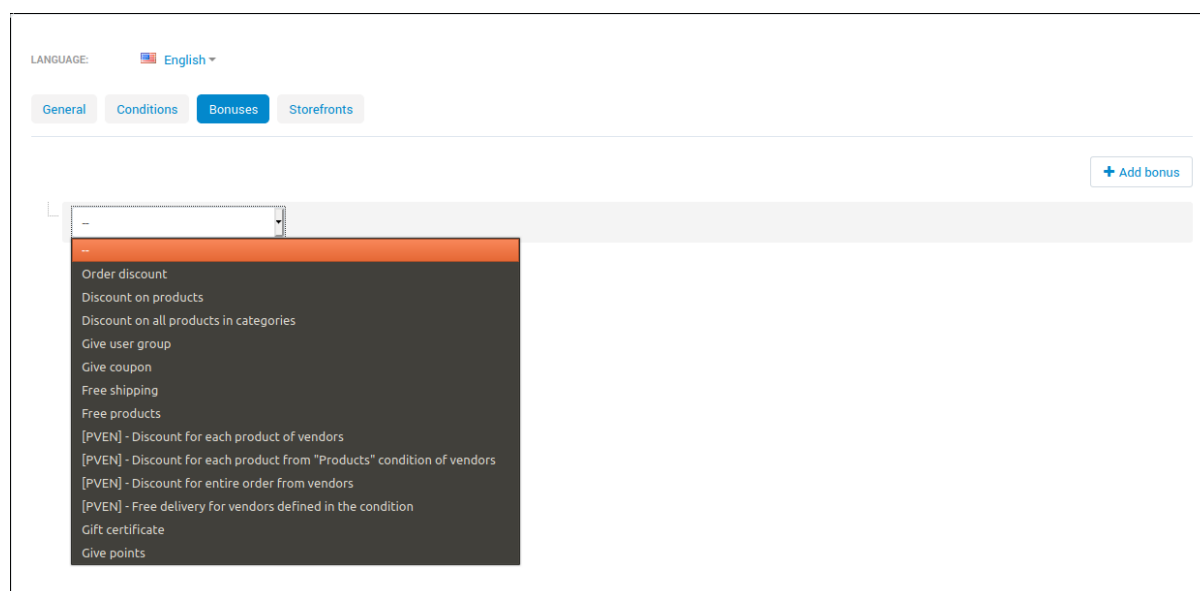

Vendor(s) products in cart - basic promotion condition. Defines which vendor's products are used for calculations in other conditions.

Subtotal of vendors products - summary cost of products from all selected vendors, which has to be fulfilled to trigger promotion. All standard operators are available.

Number products of vendor(s) in basket - summary quantity of products from all selected vendors, which has to be fulfilled to trigger promotion. All standard operators are available.

Activate promotion of only products of this vendor in cart - a special condition without settings. If added, promotion will trigger only if cart will contain products only from selected vendor(s).

Bonuses

All bonuses created by this add-on start with [PVEN] tag.

Discount for each product of vendors - basic promotion bonus. Discounts each product separately, by amount specified in bonus. Only products from selected vendors (those who are set in condition "Vendor(s) products in cart") will be discounted.

Discount for each product from the "Products" condition of vendors - works exactly in the same way as the previous bonus, but also requires the condition "Products" to be set. Only products from this condition will be eligible for discount.

Discount for entire order from vendors - discounts entire order from selected vendors, without splitting the discount between products.

Free delivery for vendors defined in the condition - gives a free shipping for selected vendors. If you want to give a range of free shippings to select from, create multiple instances of this bonus.

Vendor plans settings

Allow vendors create their own promotions: ☒

Page with plan description: --- Choose ---

After add-on installation, in each vendor plan configuration a new checkbox will appear, “Allow vendors create their own promotions”. This checkbox is by default checked for all plans. If unchecked, vendors with this plan assigned won’t be able to access promotion menu. They can still take part in promotions created by administrators, though.

3. Add-on functionality and use cases

Basic catalog promotion

To create a basic catalog promotion, we need to add the condition “[PVEN] - Discount for products from vendors”. In this condition, we define which vendors products are affected by the promotion.

There is no change to bonuses for catalog promotion - we use standard “Product discount” bonus.

Editing promotion: Cheaper products from three vendors!

Acme Corporation
We at Acme are committed to providing you, our customer, with the best in products that make your life not necessarily easier but, well, as the kids say, "rigorously interesting". Too many catalog stores only make life complicated by offering quality, quality, quality and not listening to the needs of the customer, who wants more than anything to have something no one else has regardless of how well it's made.

Basic cart promotion

Cart promotions are created in a very similar way, except that they have access to more conditions & bonuses. In below example, we create a promotion that uses three conditions:

- products have to be from vendors: Acme Corporation, Cyberdyne Systems, John McDowell's goods
- summary subtotal of vendors products must be above 100 USD
- promotion will trigger only if cart contains products from one vendor (if customer will add one Acme product and one Cyberdyne product to cart, promotion won't be activated)

As a bonus, promotion gives a 50% discount for all vendors' products.

The screenshot shows the 'Conditions' tab of a promotion configuration. At the top, there are three tabs: 'General', 'Conditions' (selected), and 'Bonuses'. Below the tabs, a dropdown menu indicates 'If all of these conditions are true'. To the right of this menu are two buttons: '+ Add condition' and '+ Add group'. The main area contains three conditions, each with a label, a value, and a dropdown menu for the operator. The first condition is '[PVEN] - Activate promotion of only products of this vendor in cart' with a value of 'Yes'. The second condition is '[PVEN] - Subtotal of vendors products' with a value of 'greater' and a text input field containing '100'. The third condition is '[PVEN] - Vendor(s) products in cart' with a value of 'equal' and a text input field. To the right of the third condition is a button labeled 'Add vendors'. Below the conditions is a section titled 'Name' with a list of vendors: 'Acme Corporation', 'Cyberdyne Systems', and 'John McDowell's goods'.

The screenshot shows the 'Bonuses' tab of a promotion configuration. At the top, there are three tabs: 'General', 'Conditions', and 'Bonuses' (selected). Below the tabs, a dropdown menu indicates 'LANGUAGE: Polski'. To the right of this menu is a button labeled 'Create'. The main area contains a single bonus, with a label '[PVEN] - Discount for products of vendors:' and a red arrow pointing to it. To the right of the label is a button labeled 'Add vendors'. Below the label is a section titled 'Name' with a list of vendors: 'Acme Corporation', 'Cyberdyne Systems', and 'John McDowell's goods'. At the bottom, there is a dropdown menu for the discount type, set to 'by percentage of the original price', and a text input field containing '50.00'.

Restrict promotion to selected products

It is also possible to restrict promotion only to selected products, not entire vendor assortment. To do this, we just create a promotion as usual, but we use bonus "[PVEN] - Discount for each product from the "Products" condition of vendors". We also need to add "Products" condition, to define range of products promotion is able to discount.

Creating promotions for vendors

Vendors also have access to all promotions functionalities mentioned previously. By default, all vendors can access it, but you can change that by modifying settings of vendor plans.

Vendors can access promotions menu as usual, through Marketing -> Promotions menu.

CS-Cart Polska Acme Corporation

Orders Products Customers Marketing Website Vendors

← Promotions

Promotions
Promote goods and offer bonuses basing on customers memberships.

LANGUAGE: English

<input type="checkbox"/> Name	Priority	Zone
<input type="checkbox"/> 50% discount for all watches! Acme Corporation	0	Cart

While vendors have access to all conditions & bonuses (unless you block them in add-on configuration), they are restricted to not affect other vendors - they only see their own products, and condition "Vendors product(s) in cart" shows only one vendor.

Promotions created by vendors are marked with company name under promotion name.
